

**UCSD Medical Center
Food and Nutrition Services
Policy and Procedure Manual**

SUBJECT: Juven Preparation

Policy 5._

Area: Patient Meal Assembly and Service

Effective Date: October 25, 2010

Review/Revision Date: August 22, 2011

Approved By:

Primary Responsibility: AM and PM Snack worker

Coordinating Responsibilities: Supervisors

Policy: Juven will be prepared twice a day by the AM and PM snack foodservice workers. Prepared Juven will be distributed with AM and PM snacks.

Purpose: To ensure that the patients with Juven orders receive the prepared supplement twice a day and to increase the likelihood that the Juven will be consumed by eliminating the need for patients to mix the Juven themselves.

Procedure: When a patient has an order for Juven, this order will be entered as AM and PM snacks by dietitian or diet tech. Orders for Juven always consist of two Juven per day. Labels will print out in the call center with the regular snack labels- one Juven for AM, one for PM.

The AM and PM snack preparers will receive the Juven labels along with all other snack labels. The Juven will be prepared by mixing the packet of Juven with 4 oz of juice and 4 oz of water in a cup until powder is dissolved. The cup will be covered and the Juven snack label will be placed on the cup.

Prepared Juven will be distributed with AM and PM snacks. Juven will not be distributed with meals.
